

**SOME SURPRISES
ARE GOOD....**

**SURPRISE MEDICAL
BILLS ARE NOT.**

Surprise! You just got hit with a huge and unexpected medical bill.

Surprise bills affect millions of Americans and are caused by a small group of providers who purposely stay out of network to charge patients more.

Now Congress is deciding how to end surprise medical bills.

Some are proposing arbitration. But it would add more bureaucracy and raise costs. And, it would encourage some specialists to raise their rates even higher in attempt to game the system.

There's a simpler and better solution: A fair rate – tied to local, market-based negotiations – for out-of-network providers would end surprise medical bills once and for all.

When it comes to ending surprise bills, we need to pick the right policy.

Stop surprise medical bills the Right Way.
